

Heroku Deployment

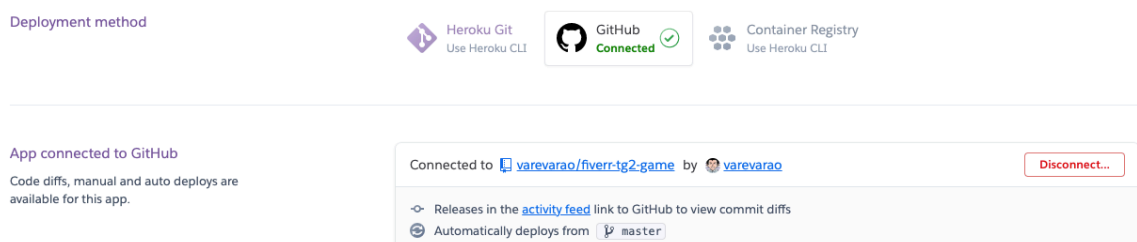

1. Go to heroku.com and create a new account, once complete sign in
2. Go to the [apps dashboard](#), and create a new app, follow the instructions

3. On the apps dashboard, click on the newly create app
 - You'll be taken to the app overview page
 - Click on the '**Settings**' tab, and scroll down to the section named '**Buildpacks**', click on the *Add buildpack* button, and select NodeJS, then save

- Scroll back up, and head over to the '**Deploy**' tab, and scroll down to the section named '**Deployment method**', select the option named '*GitHub*'
- You'll see an option to '*Connect*' your GitHub account to Heroku. This will allow automatic deployment from your master branch to the heroku app.

- To do a manual deploy, scroll to the bottom, and click on the '*Deploy branch*' button.

Manual deploy

Deploy the current state of a branch to this app.

Deploy a GitHub branch

This will deploy the current state of the branch you specify below. [Learn more.](#)

Choose a branch to deploy

 master

Deploy Branch

- Scroll back to the top, and click on the button name '*Open app*' in the top right corner to view your deployed app
